

Recommendation of the Council on the Control of Eutrophication of Waters

**OECD Legal
Instruments**

This document is published under the responsibility of the Secretary-General of the OECD. It reproduces an OECD Legal Instrument and may contain additional material. The opinions expressed and arguments employed in the additional material do not necessarily reflect the official views of OECD Member countries.

This document, as well as any data and any map included herein, are without prejudice to the status of or sovereignty over any territory, to the delimitation of international frontiers and boundaries and to the name of any territory, city or area.

For access to the official and up-to-date texts of OECD Legal Instruments, as well as other related information, please consult the Compendium of OECD Legal Instruments at <http://legalinstruments.oecd.org>.

Date(s)

Adopted on 14/11/1974
Abrogated on 13/12/2016

THE COUNCIL,

HAVING REGARD to Article 5 b) of the Convention on the Organisation for Economic Co-operation and Development of 14 December 1960;

HAVING REGARD to Recommendation 51 of the United Nations Conference on the Human Environment in relation to the protection of the quality of water resources, which are a primary need for social and economic development;

HAVING REGARD to the Recommendation of the Council of 26 May 1972 on Guiding Principles concerning International Economic Aspects of Environmental Policies [C(72)128];

CONSIDERING the importance of the accelerated degradation of the water environment due to the phenomenon of eutrophication resulting from man's activity;

CONSIDERING that the principal causes and mechanisms of eutrophication resulting from man's activity are now better understood and known to follow from the excessive input to surface waters of nutrient substances, such as phosphorous and nitrogen compounds;

CONSIDERING that States have a responsibility to ensure that activities within their jurisdiction or control do not cause damage to the environment of other States;

CONSIDERING the need for continued co-operation on the monitoring of eutrophication and on exchange of experience in respect of control techniques;

CONSIDERING that the OECD Reports on Eutrophication Control:

- Represent a valuable record of the acquired experience in Member countries in regard to technical possibilities for control of eutrophication, and a consensus on alternative strategies for control;
- Show that, although there is no unique policy for eutrophication control, a number of steps can be taken. These steps directed at the control of nutrient substances include: treatment of municipal sewage and industrial effluents including nutrient removal; decreasing the contribution from various agricultural activities; and, where appropriate, control at source by product modification, as in the case of the replacement of phosphates in detergents;

Further **NOTING** the desirability, in certain circumstances, of harmonizing policies;

On the proposal of the Environment Committee;

I. RECOMMENDS that Governments of Member countries take measures to reduce to the extent required the pollution of surface waters resulting in eutrophication, with particular reference to the problem arising from the transfer of nutrient loaded waters across frontiers, taking into account the OECD conclusions on Eutrophication Control.

II. INVITES the Governments of Member countries to inform the Organisation, within a year, on the measures taken pursuant to this Recommendation.

III. INSTRUCTS the Environment Committee to follow the implementation of this Recommendation and to report thereon to the Council.

About the OECD

The OECD is a unique forum where governments work together to address the economic, social and environmental challenges of globalisation. The OECD is also at the forefront of efforts to understand and to help governments respond to new developments and concerns, such as corporate governance, the information economy and the challenges of an ageing population. The Organisation provides a setting where governments can compare policy experiences, seek answers to common problems, identify good practice and work to co-ordinate domestic and international policies.

The OECD Member countries are: Australia, Austria, Belgium, Canada, Chile, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Latvia, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, the Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States. The European Union takes part in the work of the OECD.

OECD Legal Instruments

Since the creation of the OECD in 1961, around 450 substantive legal instruments have been developed within its framework. These include OECD Acts (i.e. the Decisions and Recommendations adopted by the OECD Council in accordance with the OECD Convention) and other legal instruments developed within the OECD framework (e.g. Declarations, international agreements).

All substantive OECD legal instruments, whether in force or abrogated, are listed in the online Compendium of OECD Legal Instruments. They are presented in five categories:

- **Decisions:** OECD legal instruments which are legally binding on all Members except those which abstain at the time of adoption. While they are not international treaties, they entail the same kind of legal obligations. Adherents are obliged to implement Decisions and must take the measures necessary for such implementation.
- **Recommendations:** OECD legal instruments which are not legally binding but practice accords them great moral force as representing the political will of Adherents. There is an expectation that Adherents will do their utmost to fully implement a Recommendation. Thus, Members which do not intend to do so usually abstain when a Recommendation is adopted, although this is not required in legal terms.
- **Declarations:** OECD legal instruments which are prepared within the Organisation, generally within a subsidiary body. They usually set general principles or long-term goals, have a solemn character and are usually adopted at Ministerial meetings of the Council or of committees of the Organisation.
- **International Agreements:** OECD legal instruments negotiated and concluded within the framework of the Organisation. They are legally binding on the Parties.
- **Arrangement, Understanding and Others:** several ad hoc substantive legal instruments have been developed within the OECD framework over time, such as the Arrangement on Officially Supported Export Credits, the International Understanding on Maritime Transport Principles and the Development Assistance Committee (DAC) Recommendations.
